HUNGARY

-25X1-

Locations at NYIREGYHAZA

i) Source has now given the following supplementary information:-

- No. 1. These are very old barracks dating perhaps from 1914/1918 days. They have been modernized at some stage, but source could not say when. Source does not know which of the streets on the map is Zsigmond Moricz Ut but states that the barracks are clearly labelled over the gate "DOZSA LAKTANYA".
- No. 2. These barracks bear the inscription "DAMJANIDS JANOS LAKTANYA" and are now. Capacity about 2 battalions. Occupied by A.V.H.
- No. 3. These barracks are labelled "GABOR ARON LAKTANYA" and are at No. 42 Honved Ut. Source found no other barracks in this street. The barracks looked as though they were old but had been renovated. He does not know whether or not they were formerly called the HONVED barracks (this simply means Army Barracks, anyway).
- No. 4. These are new barracks with the entrance on the south side. Name unknown. Occupied by Hungarian infantry: capacity 2 - 3 battalions.
- No. 5. Hungarian Police barracks, with entrance on east side. Consists of a 3-storey main building parallel to it on the west side.
- No. 6. Old barracks, in dilapidated condition, abandoned. Possibly at one time a cavalry barracks as there are stables (empty) covering 60 x 8 m.
- No. 7. An A.V.H. building. Capacity 25 - 30 men. Source takes it to be the town watch-post of the A.V.H.
- No. 8. Hungarian military Q.M. store.
- No. 9. Police praesidium
- No. 10. Town Hall (Bessengei ter).
- No. 11. New building, not yet completed. Appears to be a public building of some kind.
- No. 12. Civilian hospital.
- No. 13. The airfield is situated exactly as marked on the map. It looks very neglected (burnt-out buildings, etc.) The only serviceable building appears to be the radio building (4 x 4m) in the S.W. corner of the airfield (see para. 1.c of report). No aircraft or personnel observed. No concrete runway. No "Windsock". Source's observation points (on the road NYIREGYHAZA - KIRALYTELEK) marked with crosses on map.

ii) The references are to the numbers on the map attached
